Technical and Project Engineering, LLC (TAPE) is a trusted provider of agile, DevSecOps-based IT, training, and management solutions to the Federal Government. Our experts help clients solve complex challenges by integrating internal expertise with existing processes. We develop agile software for the Army that builds readiness by modeling financial requirements for individual and unit training. We helped the Marine Corps develop services that track acquisition support and logistics for training facilities and devices. We also helped Immigration and Customs Enforcement earn cyber security awards for our IT security management and oversight and Risk Management Framework (RMF) assessments. Whether the challenge is keeping our nation safe, or making the military or government more efficient and cost effective, **TAPE provides measurable results.**

The Veterans Technology Services 2 (VETS 2) government-wide acquisition contract (GWAC) is a multiple award, indefinite-delivery, indefinite-quantity vehicle available to any Federal Government agency through the General Services Administration (GSA).

Through this vehicle, on which TAPE is a prime contractor, we provide government clients with customized, agile IT services-based solutions with a DevSecOps approach, which can be tailored to meet an organization's particular mission needs. Our full spectrum of IT services includes cyber security and Risk Management Framework assessments. Contractors may perform services at government and contractor locations, as specified in each task order.

VETS 2 Advantages for Federal Agencies
