

Resource Optimization

- Strategic Financial Planning and Auditing
- Budgeting / PPBE Support
- Performance and Program Evaluation
- Cost Forecasting and Modeling
- Risk & Staffing Level Management
- Deterministic Modeling

Planning, Programming, Budgeting & Execution (PPBE)

- Technical Project Management
- Budget Controls and Change Management
- SMEs / Management Staffing
- Performance Management and Support

Enterprise Application Maintenance & Modernization

- IT Consulting
- Data / Systems Analysis
- Cloud Services
- Database Design, Development and Management
- Modeling Support Services
- Software Development and Maintenance

DEEP EXPERTISE

Resource Modeling & PPBE Analysis

Advanced modeling and analysis supporting PPBE decisions —optimizing funding for training, readiness, and operational sustainment across Army programs.

Audit & Surveillance Expertise

Disciplined performance monitoring and quality assurance to ensure compliance, detect issues early, and sustain reliable operational outcomes.

Mission-Focused Reporting & Accountability

Timely, precise delivery of plans, reports, and financial tracking that provides leaders with clear visibility into progress, risks, and resource execution.

DEMONSTRATED IMPACT

- Enabled data-driven decisions on \$600M in Army pay and allowances by co-developing the Manday Resource Model (MRM), synchronizing forecasts with TRM and ATS to meet accelerated PPBE deadlines and cut response times from 1.5 hours to 30 minutes.
- Optimized \$400M in training requirements by applying ATM models to reduce readiness risk, prioritize critical funding needs, and strengthen G-3 Training resource allocation decisions.
- Modernized Army training analytics by developing and cloud-migrating advanced models (1-N and Civilian Training Module), expanding program manager access to 14 databases across two data centers and improving efficiency in training resource allocation.
