

Cybersecurity Operations

- Cyber Resiliency Engineering
- Defensive Measures & Controls
- Vulnerability Assessments and Remediation
- Risk Management Framework (RMF)
- Certification and Accreditation
- Network Security & Monitoring

Enterprise Application Maintenance & Modernization

- IT Consulting
- Data / Systems Analysis
- Cloud Services
- Database Design, Development and Management
- Modeling Support Services
- Software Development and Maintenance

Independent Verification & Validation

- Cost Savings Through Early Defect Detection
- Faster Time to Market
- Risk Management
- Enhanced Quality Control
- Program Transparency
- Clear Milestones & Deliverables
- Cost Efficiency

DEEP EXPERTISE

Cybersecurity & Vulnerability Assessment

Comprehensive risk and vulnerability assessments aligned with NIST and FISMA—proactively identifying threats to protect data, systems, and mission continuity.

ISSO & FISMA Compliance Support

Expert cybersecurity analysis and documentation supporting ISSOs in maintaining continuous FISMA compliance and audit-ready system authorizations.

Software Development & Interoperability

Secure development and sustainment of interoperable training and decision-support systems—meeting ATO requirements and enabling accurate, data-driven leadership decisions.

DEMONSTRATED IMPACT

- Streamlined INSCOM IT operations by identifying actionable trends and process improvements—reducing inherited backlogs, improving workflow efficiency, and exceeding leadership expectations for quality and timeliness.
- Delivered seamless global command support through PMP-certified program management, executing projects from software upgrades to network contingency planning while ensuring security compliance and eliminating document rework.
- Accelerated Army planning cycles by 45% by leading the cloud migration of ATM applications and databases—consolidating five dashboards into one and enabling faster, more efficient data access across millions of records.
- Enabled data-driven training resource decisions by managing 15 relational databases and six advanced models, transforming complex data into intuitive dashboards and reports compliant with congressional mandates.
